

SQL EXAM PAPER

RUPANKAR GHOSH | SQL

Full Marks: 100

Time: 60 Minutes

Instructions:

1. Answer all questions.
 2. Create the given tables and insert the records.
 3. Choose suitable data types for the columns.
 4. Write SQL queries for each question.
-

1. Create the following two tables and insert the given records. [20]

Table 1: Employee

Employee_ID	Employee_Name	Salary	Joining_Date	Department_ID
1	Arindam	28000	15-02-2013	101
2	Suman	34000	09-01-2015	102
3	Nancy	31000	20-01-2013	101
4	Ajeet	25000	15-08-2016	102
5	Karan	20000	06-01-2016	103

Table 2: Department

Department_ID	Department_Name	Location	Manager
101	IT	Kolkata	Amit
102	Sales	Delhi	Rohit
103	HR	Mumbai	Neha
104	Payroll	Pune	Sumit
105	Admin	Kolkata	Raj

Basic SQL

2. Write SQL queries to perform the following operations: [10]

- a) Display all records from the `Employee` table. [2]
 - b) Display only `Employee_Name` and `Salary`. [2]
 - c) Add a new column `Email` to the `Employee` table. [2]
 - d) Update the salary of **Karan** to ₹22,000. [2]
 - e) Delete the record of **Ajeet**. [2]
-

3. Write a query to display employees whose salary is greater than ₹25,000. [5]

4. Write a query to display employees whose name starts with 'A'. [5]

5. Write a query to display the employees who joined in the year 2013. [5]

6. Write SQL queries to display: [10]

- a) Employee names in **uppercase**. [3]
 - b) The **total number of employees**. [2]
 - c) The **highest salary**. [2]
 - d) The **lowest salary**. [2]
 - e) Employees arranged by salary in **descending order**. [1]
-

GROUP BY

7. Write a query to display the `Department_ID` and total salary for each department. [10]

8. Write a query to display the Department_ID and number of employees in each department. [5]

JOIN

9. Using a JOIN between the `Employee` and `Department` tables, display: [10]

- Employee_Name
 - Salary
 - Department_Name
 - Location
-

UNION & INTERSECT

10. Write SQL queries using UNION and INTERSECT: [10]

a) Using `UNION`, display Employee_IDs of employees whose salary is greater than ₹30,000 **or** whose Department_ID is 101. [5]

b) Using `INTERSECT`, display Employee_IDs of employees whose salary is greater than ₹25,000 **and** whose Department_ID is 101. [5]
