

Advanced Excel Practice Question Paper

Power Query • Power Pivot • DAX • KPIs • Dashboard

Prepared by: Rupankar Ghosh

Difficulty: Advanced

Duration: 1 Hour

Total Marks: 100

Dataset

Create the following Excel tables (or download similar datasets from Kaggle):

1. Sales Table

OrderID Date ProductID CustomerID Region Salesperson Quantity Unit Price Discount

2. Products Table

| ProductID | Product Name | Category | Brand | Cost Price |

3. Customers Table

| CustomerID | Customer Name | City | State | Segment |

4. Calendar Table

Include:

- Date
 - Day
 - Month
 - Month Name
 - Quarter
 - Year
 - Week Number
-

Section A – Power Query (30 Marks)

Question 1 (5 Marks)

Import all four tables using **Power Query**.

Perform the following:

- Remove duplicate records.
 - Replace blank values with appropriate defaults.
 - Change incorrect data types.
 - Rename all columns properly.
-

Question 2 (5 Marks)

Using Power Query:

Create a new column

Sales Amount

= Quantity × Unit Price

Create another column

Net Sales

= Sales Amount - Discount

Question 3 (5 Marks)

Split the Customer Name into

- First Name
 - Last Name
-

Question 4 (5 Marks)

Merge

Sales Table

with

Products Table

Bring

- Product Name
- Category
- Cost Price

Expand only required columns.

Question 5 (5 Marks)

Append two yearly sales files

Sales_2024

Sales_2025

into one master table.

Question 6 (5 Marks)

Group data by

Category

and calculate

- Total Sales
 - Total Quantity
 - Average Discount
-

Section B – Power Pivot & Data Model (30 Marks)

Question 7 (5 Marks)

Load all cleaned tables into the **Data Model**.

Create relationships between

Sales ↔ Products

Sales ↔ Customers

Sales ↔ Calendar

Question 8 (5 Marks)

Create the following calculated columns

Profit

= Net Sales - (Quantity × Cost Price)

Profit %

Question 9 (10 Marks)

Create the following DAX Measures

Total Sales

Total Profit

Average Sales

Total Quantity

Total Orders

Question 10 (10 Marks)

Create advanced DAX Measures

YTD Sales

Previous Year Sales

Growth %

Running Total

Average Order Value

Section C – KPIs (20 Marks)

Question 11 (10 Marks)

Create KPI for

Sales Target = ₹15,000,000

Show

- Green → Above Target
 - Yellow → Near Target
 - Red → Below Target
-

Question 12 (10 Marks)

Create KPI for

Profit Margin

Target

25%

Display

- Indicator
 - Trend
 - Status
-

Section D – Dashboard (20 Marks)

Create an Executive Dashboard containing

Cards

- Total Sales
 - Total Profit
 - Profit Margin
 - Total Orders
 - Average Order Value
-

Charts

Sales by Region

Sales by Category

Monthly Sales Trend

Top 10 Products

Profit by Brand

Slicers

- Year
 - Quarter
 - Category
 - Region
 - Salesperson
-

Timeline

Add a Date Timeline connected to all Pivot Charts.
