-

Section C – Formula Practice (15 Marks)

Q1.

Create a new column named **Total Amount**.

Formula:

Total Amount = Qty × Price

Q2.

Calculate:

- Total Quantity
- Total Sales
- Average Price
- Highest Price
- Lowest Price

Use appropriate formulas.

Q3.

Create a column named **Discount**.

If Total Amount is greater than ₹50,000, give a discount of ₹2,000; otherwise ₹500.

Use the **IF()** function.

Q4.

Create another column named **Net Amount**.

Formula:

Net Amount = Total Amount – Discount

Section D – Sorting & Filtering (5 Marks)

1. Sort Product Name from A to Z.
 2. Sort Price from Highest to Lowest.
 3. Filter only Electronics products.
 4. Filter products with Quantity greater than 5.
 5. Remove all filters.
-
